Navigating throughout the application			X		

Redability of application's contents				X	
Resolution (size) of application			X		
Error message clarity				X	
Overall satisfaction				X	

General Usability Questions

First Impressions

- What are your first thoughts when you see the app's main screen?
- Is the purpose of the app clear from the start?
- How easy or difficult is it to understand what to do next?

The entire interface is clear and intuitive to use. Personally, this suits me because I like minimalism and functionality

Navigation and Layout

- How easy is it to navigate through the app?
- Can you find the main features (user records, imperial/metric conversion, calorie calculator) easily?
- Did you encounter any difficulties in finding specific functions?

Navigating this application is very pleasant and comfortable. Main features are easy to see.

Visual Design

- How do you feel about the overall design and aesthetics of the app?
- Are the fonts, colors, and layout pleasing and easy to read?
- Is there anything visually distracting or confusing?

As I mentioned, I like minimalism and functionality. The colors are very calm and the font and text are clearly visible. Nothing confused me while testing the app.

Error Handling and Feedback

- Have you encountered any error messages? Were they helpful?
- How does the app respond when you make a mistake or input incorrect data?
- Is the feedback (success or error messages) timely and clear?

I haven't encountered any error messages or inaccuracies.

Specific Feature Questions

Registration and Login

- Was the registration process straightforward and intuitive?
- Did the form validation work as expected?
- How was your experience with logging in? Any issues or confusion?

Everything's all right. As I mentioned, the clarity and intuitiveness of the interface is perfect.

Notes Management

- How easy is it to create, read, edit, and delete notes?
- Is the notes interface intuitive and easy to use?
- Are the options and functionalities for managing notes clearly visible and accessible?

It's very easy to use.

Metric to Imperial Conversion

- How straightforward is the process for converting metric to imperial units?
- Is it clear how to use the conversion feature?
- Did the results meet your expectations?

The process is very quick and simple. It met my expectations.

Calorie Calculation

- How easy is it to navigate to and use the calorie calculator?
- Is it simple to select food items and input their quantities?
- Are the results of the calorie calculations easy to understand and accurate?

As I mentioned, the clarity and intuitiveness of the interface is great. All operations are easy to do and their results satisfy me.

User Experience Questions

Overall Satisfaction

- How satisfied are you with your overall experience using the app?
- What did you like most about the app?
- What did you dislike or find frustrating?

Satisfaction 8.5/10

The best thing: Interface and operations

The worst thing: Limited operations

Ease of Use

- How would you rate the ease of use of this app on a scale of 1 to 10?
- Were there any moments where you felt stuck or unsure of what to do next?
- Is there any feature or aspect of the app that seemed unnecessary or overcomplicated?

10/10

No, I didn't

On the contrary, there are too few options

Suggestions for Improvement

- What features or functionalities do you think are missing from the app?
- Do you have any suggestions for improving the user interface or user experience?
- If you could change one thing about the app, what would it be?

More options

Interface is already perfect

I would add ready-made diet templates

Performance and Reliability

- Did you notice any lag or performance issues while using the app?
- How reliable was the app during your testing? Did it crash or behave unexpectedly?
- Were there any loading times that seemed too long or disrupted your experience?

Negative three times

Task-Based Questions

Completing Specific Tasks

- Can you register a new account and log in without assistance?
- Can you create, edit, and delete a note? How easy was it to do this?
- Can you perform a metric to imperial conversion for a given unit?
- Can you calculate the total calories for a meal using the calorie calculator? How intuitive was this process?

Yes, I can
Yes, I can. It didn't make any difficulties
Of course
Yes, I can. The process was quick and efficient 12/10

Scenarios

- Imagine you need to quickly jot down a note while on the go. How does the app perform in this scenario?
- If you're using the app to convert units while cooking, is it fast and efficient?
- For a fitness enthusiast tracking their food intake, how useful and user-friendly is the calorie calculator?

In this scenario, the application achieved its main goal. I felt satisfaction and fulfillment.
Not big deal for this application
I am not fitness enthusiast, so I don't have formed opinion but for the person who had the pleasure of testing this application, my expectations were met

Demographic and Contextual Questions

User Background

- What is your familiarity with using mobile apps for note-taking or unit conversion?
- How often do you use similar apps, and which ones do you use most frequently?
- What kind of device are you using to test this app (e.g., smartphone, tablet)?

I am generation Z, so app It didn't make any difficulties while using.
I use similar apps everyday
I tested on my PC

Context of Use

- In what environment or situation do you envision using this app most often?
- How well does the app fit into your daily routine or specific needs?
- Are there any specific contexts where you think the app would be particularly helpful or not useful?

I use this app at home during eating breakfasts and before the sleep
It fits great to my daily routine
The application was helpful in losing and controlling weight

Follow-Up Questions (Optional)

Final Thoughts

- Would you recommend this app to others? Why or why not?
- How likely are you to continue using this app after this testing session?
- Do you have any additional comments or thoughts about your experience?

I would recommend the applications to anyone who likes minimalism, transparency and functionality.
Friendly and easy-to-use interface

I'm currently waiting for updates with new features

I finally got access to a useful application without ads or intrusive micropayments. I will be happy to remain among the active users of this application and I will try to help author improve capabilities of the app.

English is not my native language, so I apologize for any inaccuracies or mistakes.
